Re: RHC Billing information

Below is a link to a new document produced by CMS entitled, "Medicare Billing Information for Rural Providers, Suppliers, and Physicians". This document has several easy to read provider-specific charts that you may find useful. In particular is a chart specifically for Rural Health Clinics that shows where the claims for various types of services are to be submitted.

<http://www.cms.hhs.gov/MLNProducts/downloads/RuralChart.pdf> .

You are strongly encouraged to follow this link and at least print out the RHC chart. The entire document is 36 pages but this covers all categories of providers.
